RESPONDING IS IMPORTANT AND SAFE

You can shape the future for yourself, your family, and your community for the next 10 years. Data collected in the 2020 Census will inform the distribution of more than $675 billion in federal funds to states and communities each year. Businesses, community leaders, and local governments use census data to create jobs, fund schools, ensure public safety preparedness, and support community initiatives.

The Census is safe.

The U.S. Census Bureau protects the confidentiality of everyone who responds to the Census.

The Census Bureau will never share information with anyone, including Immigration and Customs Enforcement (ICE), Department of Homeland Security (DHS), Federal Bureau of Investigation (FBI), or police.

CENSUS 2020: COUNT ALL CHILDREN

Count all children who live in your household!

Children under the age of 5 had the highest undercount of any age group in the 2010 Census.

Count all children, including newborns, in the home where they live and sleep most of the time, even if their parents don’t live there.

All children must be included in the total number of people in the household.

If a child’s time is divided between more than one home, count them where they stay most often.

If their time is evenly divided, count them where they are staying on Census Day—April 1, 2020.
