

Career and Technical Education:

HVAC

Heating, Ventilation,
and Air Conditioning

Cluster: Construction and Development

"I really love math and getting my hands dirty." Student

How do I know if this pathway is right for me?

In choosing a pathway, ask yourself :
What do I enjoy doing?
What am I good at doing?
Does this pathway align with my dreams and goals?

What do I have to do to complete this course?

This four-course sequence combines classroom instruction and "hands-on" application such as a "student built" house. Course sequence includes two courses specific to residential and commercial building.

Which Schools offer this pathway?

Carver Vocational Technical High School
The Reach! Partnership School

Have you ever needed to call someone to fix your heater or air conditioner? Have you wondered if your air filters are scrubbing the pollutants out of your air properly? This pathway produces the technicians with the skills to do that and more. Come learn how to keep people comfortable and cozy in the buildings that we use day to day.

What's the bonus?
