Graduation Status and General Info

- Any student who is potentially eligible to graduate in June 2020 will be hearing from his/her school counselor, if this has not already occurred.

- Prom, graduations, and other senior celebrations are postponed as City Schools determines next steps. Please be alert for forthcoming updates.

- City Schools has established 4th quarter senior projects as a way to establish consistent expectations and to provide students the opportunity to demonstrate that they have mastered content standards.

Advanced Placement (AP)

- Students in AP courses will still have the opportunity to take their AP exams and possibly earn college credits.

- The College Board will use students’ self-reported email addresses to communicate with them and to provide them with their AP Exam access codes in May 2020. Students should make sure that they are checking that email account for updates.

- Students and their families can review all the relevant testing updates by visiting apcoronavirusupdates.collegeboard.org/educators/taking-the-exams/ap-exam-schedule

PTECH and Dual Enrollment

- PTECH students with questions about their college courses should reach out to their PTECH school leaders.

- Dual enrollment instruction is still occurring. Our primary University partners are conducting courses through their university-specific online learning modules.

- The University partners have attempted to reach out to all enrolled students to inform them of the continuation of instruction.

Career and Technology Education (CTE)

- As with other courses, we will continue to hold CTE courses virtually. Because each pathway has different requirements, students should reach out to their teachers with any questions.

- We recognize with school buildings closed, classes will not be able to access many of the tools and equipment needed for instruction. However, teachers will still be providing content that will support students toward earning certifications.

- Instruction will be organized around weekly projects that will help students build or solidify their skills (10 projects through the end of the academic year for 9th-11th grades; 6 projects for seniors).

To learn more, review the full Transitions: A Guide for the Class of 2020 document at baltimorecityschools.org. Additional questions should be directed to your school counselor.
