Welcome

While at the collection site, please practice social distancing and wear a mask except when providing saliva. The Shield T3 test is non-invasive and shouldn't take more than 3 minutes. Follow the guidelines below and any instructions you receive from site staff.

Prep

- Retrieve a vial and funnel.
- Do not eat, drink, smoke, or brush your teeth within an hour of your test.
- Write your birth month and day on the vial.
- Sanitize your hands.
- Place the scanned sample where directed.

Provide saliva

- Remove the cap and hold on to it.
- Attach the funnel securely to the vial.
- Deposit 1 to 1.5 ml of saliva into the funnel.
- Remove the funnel and discard it in a medical waste container.
- Screw the cap on the vial and tighten so the vial is completely sealed.

Scan

- Sanitize the vial and your hands with a sanitizing wipe.
- Write your birth month and day on the vial.
- Retrieve a bag. Put your vial in the bag, and seal.
- Present the vial and QR code for scanning.
- Place the scanned sample where directed.
