

Career and Technical Education: Homeland Security Criminal Justice and Law Enforcement

Cluster: Human Resource Services

"The program accepted me in a way that I have an open mind to issues and people and how to react, critically think, and critically write. It has prepared me for college-level learning and college-level writing. I know I will be very successful because of this program." - Student

How do I know if this pathway is right for me?

In choosing a pathway, ask yourself:
What do I enjoy doing?
What am I good at doing?
Does this pathway align with my dreams and goals?

What do I have to do to complete this course?

This four-course sequence prepares students for industry certification and college credit in one of two areas: Homeland Security Scientist or Information/ Communications Technology. Students focus on protecting against threats to public safety through effective communication, preparedness, detection, prevention, response and recovery. All areas conclude with a capstone project mentored by industry partners.

Courses include: Foundation of Homeland Security and Emergency Preparedness, Homeland Security Science, Advanced Geographic Information Systems and Remote Sensing, and a Homeland Security and Emergency Preparedness Internship.
