

Career and Technical Education:

Masonry

Cluster: Construction and Development

"It is cool to have skills that I can help others and make money while still in high school." Student

From our beautiful brownstones, to the concrete and stone pavers that line our pathways, our masons lay the foundations that provide both support and beauty to our world. Masonry teaches students to lay, stone, bricks, and pavers in a variety of patterns and applications. By making the paths level and straight, and keeping the walls plumb and true, our masons provide us with the warmth and beauty that helps us feel safe, protected, and cozy in all types of ways.

What's the bonus?

- Optional Drivers Education
- Site visits
